

Cabot Corporation to Increase Prices for Activated Carbon Globally

September 3, 2019

BOSTON – September 3, 2019– Effective for all shipments made on or after October 1, 2019, or as customer contracts allow, Cabot Norit Activated Carbon will increase prices globally for all activated carbon products. Price increases will range from 5 percent to 15 percent, depending on the specific activated carbon product and region.

The price increase has become necessary due to escalating raw material, operating, environmental compliance and freight costs. The price increase will enable Cabot to support continued investment in product and application development. Furthermore, it will ensure that Cabot remains a reliable, long-term supplier of high quality activated carbon products and services to its customers.
